

What are our group categories?

## A Focused Journey

From a Wonderling's first steps in nature's playground to an Explorer ready to change the world, our five age-based programs nurture confidence, curiosity, and care through hands-on discovery in living ecosystems.

### WONDERLINGS

18 m – 2 yrs

First touches, first tastes, first moments of pure amazement in nature's playground.

### SEEKERS

2 yrs - 3 yrs

Curious minds asking 'what's this?' as they discover the magic hiding in every leaf and stone.

### PATHFINDERS

3 yrs - 4 yrs

Independent explorers charting their own course through gardens, questions, and growing confidence.

### TRAILBLAZERS

4 yrs - 5 yrs

Bold adventurers leading the way, solving problems, and creating new possibilities in nature's laboratory.

### EXPLORERS

5 yrs - 6 yrs

Young scientists and earth-keepers ready to investigate, innovate, and inspire change in the world around them.

## Nature Based Learning in Bengaluru

A Nature Based Pre-school Rooted In Sustainability, Empathy And Purposeful Exploration.

RMV | Manyata | More locations coming soon..

Good ideas are meant to grow. Let this  
one return to the earth. Please recycle.

This is not a preschool. This is a beginning.

## Why Vana Early Years?

Ekya Vana Early Years is Bengaluru's first nature - inspired early childhood program built entirely around conservation and sustainability. Instead of only teaching about nature, we learn from it. Where others talk about the future, we're preparing the guardians who will protect it.

### OUR LEARNER'S BECOME:

Conscious Stewards  
Curious Explorers  
Compassionate Leaders

Built on Wonder, Growing with Purpose

## Our Philosophy

At Ekya Vana, education aligns with nature's rhythms, allowing children to learn through genuine curiosity rather than just structured lessons. Children develop earth sense - an instinct to notice and care for the natural world. They crouch by blooming plants, listen for new bird calls, and ask big questions like 'Why do trees give us oxygen if they need it too?' Here, their bright minds learn through wonder, and discovery.

### THIS APPROACH SHAPES THEIR DAILY EXPERIENCES THROUGH SEVERAL KEY AREAS:

1. Creative Expression in Nature
2. Eco stewardship
3. Wellness and Mindfulness
4. Scientific Curiosity
5. Community and Cultural Connection

## Guided by Legacy, Growing with Purpose

### MISSION

#### WHAT WE NURTURE DAILY

To provide early learning experiences rooted through nature immersive, inquiry-led learning by encouraging sustainability and innovation for People and the Planet.

### VISION

#### WHAT WE DREAM OF

To guide learners to make a difference in the world through curiosity, compassion, and stewardship of the earth.

### Where Legacy Meets Innovation

Ekya Vana Early Years builds on CMR Group's 35 years of leadership shaping learners across Karnataka, from early years to postgraduate scholars, continually expanding what education can achieve.

### The Future Belongs To Those Who Learn To Think, Not Just Remember

Every child here joins a legacy that values imagination over imitation, exploration over explanation, and wonder over worksheets.

### We don't just nurture young minds. We ignite them.

At Ekya Vana Early Years, we understand how early years shape everything ahead. Our approach transcends traditional education, nurturing curious, confident, capable individuals ready to thrive in tomorrow's world.

## Spaces that speak

- Herb Garden
- Sensory Garden
- Mud Kitchen
- Water Play Area
- Eco Lab
- Bug Hotel
- Butterfly Garden
- Bird-Watching Nook
- Outdoor Classrooms
- Indoor Atelier
- Material Museum

Purpose-Led pathways for young explorers

## What Are Our Pathways?

### PEOPLE & PLANET

Discover How Plants, Animals, And People Are Connected  
— And Learn To Care For The Living World Together.

Children go on a backyard nature hunt, finding bugs, birds, and plants. They build a big classroom "web" connecting all the living things they discover, and learn how everyone helps care for their garden together.

### EARTH CARE

Transforming awareness into action through creativity, problem-solving, and everyday sustainable living.

Children create posters and build routines to remind everyone to turn off taps and switch off lights when not in use. As Resource Guardians, they put up their posters around the school and share their ideas with friends and family, inspiring everyone to save water and energy together.
